Colgate University

Basic Problem

(a) Raw Data

(b) Distribution of Labels

(c) Fitted Line

Figure 1: Sample classification data in a regression setting

Normal Vector

Figure 2: Normal vector w for the dotted line.

Figure 3: Sample vectors for points x_1 and x_2 above and below the dashed line.

Simple

Figure 4: A line fit to group labels onto other sides of the line.

Logistic Regression

Figure 5: A model fit with to satisfy the logistic regression criteria.
